About GreenTech USA

Established in 2009, GreenTech USA LLC is a premier general contractor and environmental engineering firm headquartered in Virginia, USA. We design, construct, and maintain water and wastewater treatment facilities, deliver comprehensive environmental assessments, and engineer advanced commercial HVAC systems. Our commitment to innovation, excellence, and sustainability has positioned us as a trusted partner to the United States government and to clients across Africa and the Middle East — with expanding reach into global markets.

VISION

To provide cutting-edge engineering solutions and unwavering support to the US government and to areas often marked by conflict and instability — addressing critical infrastructure needs in challenging zones.

MISSION

As a trusted partner to the US government, we deliver comprehensive water and wastewater solutions that prioritize efficiency, sustainability, and innovation — designing, constructing, and maintaining state-of-the-art treatment facilities that adhere to the highest standards of quality and environmental responsibility.

What We Do

A full-stack engineering practice covering design, construction, commissioning, and long-term operations & maintenance — anchored by water, wastewater, energy, and HVAC.

General Contracting

Primary oversight of complex construction programs — delivered on time and within budget.

Environmental Engineering

Assessments and creative engineering for sustainable, regulation-compliant outcomes.

Water Treatment Plant

Design and delivery of potable water facilities meeting WHO and EPA standards.

Wastewater Treatment

Modern WWTP design, retrofit, and operations across municipal and industrial scales.

Operation & Maintenance

Reliable O&M for treatment facilities with maximum uptime and predictable cost.

Commercial HVAC

Energy-efficient heating, ventilation, and cooling for government and commercial buildings.

WHY GREENTECH USA

We pair US-government-grade compliance with on-the-ground delivery in challenging zones. Our teams are experienced in IDIQ programs, design-build wastewater works, preventive maintenance, grid modernization, and large-scale HVAC retrofits. Every engagement is led by a single accountable owner — the engineer who will sign off on safety and quality.

Let's Build Together

Whether you're planning a new water treatment program, scoping an HVAC retrofit, or need a partner who can deliver in challenging conditions — start the conversation today.
